PROFESSIONAL EXPERIENCE

Junior Database Administrator

ÇAP Technology Consulting and Software Services Ltd. Co. 2023 january - September

- Designed application databases and created flow diagrams.
- Wrote DML statements and optimized queries within the application.
- Collaborative workflows were carried out with team members from different areas of the development process.

SKILLS

React

I can create user interfaces using React and its utilities for relatively small projects.

Next.js

I can create SEO-optimized web interfaces using Next.js for projects that require endpoint management.

SQL

I can write Transact-SQL scripts and design and manage relational database structures. I also have experience working with MS-SQL.

Django REST Api

I can build RESTful APIs using Django Rest Framework.

Git and GitHub

I use Git and GitHub effectively for version control and team collaboration.

Figma

I create mockups and SVG paths for use in web elements as personal projects.
